1. Retail costs are based on CPI-U of retail prices for domestically produced farm foods, published monthly by the Bureau of Labor Statistics (BLS). Farm value is the payment for the quantity of farm equivalent to the retail unit, less allowance for by-product. Farm values are based on prices at first point of sale, and may include marketing charges such as grading and packing for some commodities. The farm-retail spread, the difference between the retail value and farm value, represents charges for assembling, processing, transporting, and distributing. 2. Weighted-average value of retail cuts from pork and Choice yield grade 3 beef. Prices from BLS. 3. Value of wholesale (boxed beef) and wholesale cuts (pork) equivalent to 1 pound of retail cuts adjusted for transportation costs and by-product values. 4. Market value to producer for live animal equivalent to 1 lb. of retail cuts, minus value of by-products. 5. Charges for retailing and other marketing services such as wholesaling and in-city transportation. 6. Charges for livestock marketing, processing, and transportation. *Information contacts: Howard Elitzak (202) 694-5375, William F. Hahn (202) 694-5175*

Real indexes adjust nominal exchange rates for relative rates of inflation among countries. A higher value means the dollar has appreciated. The weights used for "total U.S. merchandise exports" index are based on U.S. total merchandise exports to the largest 85 trading partners. Weights are based on relative importance of major U.S. customers, competitors in world markets, and suppliers to the U.S. Indexes are subject to revisions for up to 1 year due to delayed reporting by some countries. High-value products are total agricultural exports less bulk exports. Source: Nominal exchange rates are obtained from the IMF International Financial Statistics. Exchange rates for the EU-12 are obtained from the Board of Governors of the Federal Reserve System. Full historical series are available back to January 1970 at <http://www.ers.usda.gov/data/exchangerates/>

1. A major revision to the weighting scheme and commodity definitions was completed in May 2000. This significantly altered the series from previous versions. Beginning in August 2002, the base of the series has been changed from 1995 to 2000.

F = Forecast. Fiscal year basis (Oct. 1 through Sep. 30). Projections are from *Outlook for U.S. Agricultural Trade*.

1. Projection includes beef, pork, and variety meats only.

2. Projection includes only federally inspected broiler meats

3. Value projection excludes wheat flour.

4. Projection excludes feed grain products.

5. Includes pulses.

6. Value projection includes juice.

7. Quantity and projections include wine and malt beverages only; nonalcoholic beverages are excluded

8. Value projection includes natural drugs.

9. Projections includes sugar and tropical products.

10. Volume includes beans only.

0 = Not available; includes mixed units and cannot be summed.

NO = Numbers. HL = Hectoliters. MT = Metric tons.

A negative value is an offset to production from prior years included in current-year sales. 2. Final sector output is the gross value of commodities and services produced within a year. Net value added is the sector's contribution to the National economy. Net farm income is farm operators' share of income from the sector's production activities. The concepts presented are consistent with those employed by the Organization for Economic Cooperation and Development (OECD). [Information contact: Roger Strickland, E-mail: rogers@ers.usda.gov]

F = forecast. -- = not available.

1. This table derives farm operator household income estimates from the Agricultural Resource Management Study (ARMS) that are consistent with Current Population Survey (CPS) methodology. The CPS, conducted by the Census Bureau, is the source of official U.S. household income statistics. The CPS defines income to include any income received as cash. The CPS definition departs from a strictly cash concept by including depreciation as an expense that farm operators and other self-employed people subtract from gross receipts when reporting net cash income. CPS specifically excludes net capital gains/losses as income. ARMS does not mention net capital gains/losses until 2004. From that point, income to farm operator households specifically excludes net capital gains/losses. Prior to that, respondents to the survey may or may not have included it as other off-farm income.

2. Prior to 2000, net cash income from operating another farm and net cash income from farmland rental were included in earnings from farming activities. For 2000 and 2001, net cash income from another farm and net cash income from farmland rental are not separable from total off-farm income in ARMS. Although there is no effect on estimates of farm operator household income in 2000 and beyond, estimates of farm self-employment income, other farm-related earnings, earnings of the farm from farming activities, and earnings of the farm from off-farm are not strictly comparable to those from previous years. In 2002, net cash income from operating another farm is once again included as earnings from farming activities. In 2003, net cash income from farmland rental is once again included as earnings from farming activities.

3. Starting in 2006, the C-corporation operator household earnings from the farm operation is the corporate dividends plus wages paid to the household. For all other legal organization farms, the operator household earnings is determined as in past years. As a result, income statement as displayed here is not additive.

4. A component of farm sector income. Excludes income of contractors and landlords as well as the income of farms organized as nonfamily corporations or cooperatives and farms run by a hired manager. Includes the income of farms organized as proprietorships, partnerships, and family corporations.

5. The ARMS collects farm business depreciation used for tax purposes.

6. Wages paid to the operator are subtracted here because they are not shared among other households that have claims on farm business income. These wages are added to the operator household's adjusted farm business income to obtain farm self-employment income.

7. Gross rental income is subtracted here because net rental income from the farm operation is added below to income received by the household.

8. More than one household may have a claim on the income of a farm business. On average, 1.1 households share the income of a farm business.

9. Wages paid to other operator household members by the farm business and net income from a farm business other than the one being surveyed. This also includes the value of commodities provided to household members for farm work. In 2000 and 2001, net cash income from another farm is included in off-farm income (see footnote 2). Starting in 2003, this category includes net income from farmland rental.

10. Wages, salaries, net income from nonfarm businesses, interest, dividends, transfer payments, etc. In 2000 and 2001, also includes net cash income from another farm and net cash income from farmland rental. In 2002, also includes net cash income from farm land rental (see footnote 2).

1. Does not include CCC Transfers to General Sales Manager. 2. Includes Export Guarantee Program, Direct Export Credit Program, CCC Transfers to the General Sales Manager, Market Access (Promotion) Program, starting in FY 1991 and starting in FY 1992 the Export Guarantee Program - Credit Reform, Export Enhancement Program, Dairy Export Incentive Program, and Technical Assistance to Emerging Markets, starting in FY 2000 Foreign Market Development Cooperative Program and Quality Samples Program, starting in FY 2003 Specialty Crops. 3. Includes cash payments only. Excludes generic certificates in FY 86-96. E = Estimated in FY 2008 Mid-Session Review Budget based on 'May 2007' supply and demand estimates. The CCC outlays shown for 2002-2008 include the impact of the Farm Security and Rural Investment Act of 2002, which was enacted on May 13, 2002. FY 2007 and FY 2008 disaster and livestock assistance programs include the impact of \$2.8 billion of outlays authorized by P.L. 110-28, which was enacted May 25, 2007. Minus (-) indicates a net receipt (excess of repayments or other receipts over gross outlays of funds). FY 2004-FY 2005 includes revised dairy outlays.

Note: This table differs from Personal Consumption Expenditures (PCE), table 2, for several reasons: (1) this series includes only food, excluding alcoholic beverages and pet food which are included in PCE; (2) this series is not seasonally adjusted, whereas PCE is seasonally adjusted at annual rates; (3) this series reports sales only, but PCE includes food produced and consumed on farms and food furnished to employees; (4) this series includes all sales of meals and snacks, while PCE includes only purchases using personal funds, excluding business travel and entertainment. For a more complete discussion of the differences, see "Developing an Integrated Information System for the Food Sector," ERS Ag. Econ. Rpt.
